

# Beole Theme

**CREATED:** 04 September 2019

**BY:** wojoscripts.com

**PREVIEW:** <http://beole.cmspro.club/>

## INSTALL

1. Login into your cms pro admin panel, and go to utilities page. From there install theme **.zip** file using auto installer. You must have cms pro 5.2+ up and running.
2. Assign your new theme from admin configuration page.

***Note:** Make sure to perform full backup. Theme will replace your existing files as well as database content, such as pages, plugins, modules etc...*

If theme requires premium module, and you already have valid license for it, make sure module is already installed.

Thank you for your purchase! If you have any questions that you feel should have been in this document, please log in using the account used to purchase the file and send message email via comment section. Thanks!

For questions on basic HTML, JavaScript or CSS editing - please give your question a quick Google or visit W3Schools as theme issues get top priority.
